

## 6 BENEFITS OF CHOOSING THE 3 MONKEYS AV TRIPLE PA SYSTEM FOR YOUR SCHOOL HALL OR UNDERCOVER AREA

## 6 BENEFITS OF CHOOSING THE 3 MONKEYS AV TRIPLE PA SYSTEM FOR YOUR SCHOOL HALL OR UNDERCOVER AREA

### 1. Superior sound and coverage

The 3 Monkeys AV Triple PA System comes standard with 4 x 10 inch speakers with built in 1.5" compression driver. It is this component that delivers superior speech intelligibility to everyone in the audience, including those who may be standing outside undercover areas.

A compression driver is far superior when utilising microphones as it enables a more natural and direct projection to the audience. This means that at that most crucial time, when young Johnny or Mary come up to the microphone to say his or her line, Mum and Dad, who have taken the time to come and see their child's assembly, can actually hear what is said loud and clear. With the speaker design and placement you will receive from this system, along with the high quality wireless microphones and electronics, struggling to hear students and teachers alike will be a thing of the past.

### 2. Ease of use – Anyone can operate it

We have designed the Triple PA System to be the most user friendly audio system for school halls and multipurpose areas without compromising features. A power distribution unit means the whole system can be turned on with one button. With labelled and colour coded faders adjusting microphone and music volumes doesn't get any easier.

### 3. Connect Any Device Easily

The Triple PA System has built in connectivity for your phone or MP3 player, laptop, iPad or USB thumb drive, as well as a built in CD/mp3 player. Better still, there is a built in slide out tray and a resting shelf for your laptop or device while it's connected. Our latest addition includes a long range built in Wireless Bluetooth receiver, allowing cable free connection of any of your devices.

### 4. Built in Protection

Rest assured that your valuable equipment is physically protected by the sturdy road case it is housed in and includes removable covers. In addition, electronic protection for speakers and amplifier is built in via gain limiting, should the system be turned up to dangerous volumes.

### 5. Doubles as your sports day, fete, or school Disco PA system

With the addition of a portable speaker kit, the Triple PA System is designed to be disconnected from the installed speaker system, wheeled out to a school oval for use during a school sports day, the quadrangle for your Anzac Day ceremony or school fete, or maybe even into the school gym for use during your school disco.

Whether within your hall or undercover area, the Triple PA System will cater for all of your school audio needs.

### 6. Training and ongoing support

Included with every Triple PA System is on site training and after sales support. The onsite training is a fun session designed to get you operating the system like a pro within about 15 minutes. We also spend time on other aspects of the sound system, including best microphone placement and technique, so you will always get the best out of the system.

Post installation and training we are always willing to assist you on the phone or via email. We will even provide further on site training sessions for your school, at no charge, for the life of the system.... Which, by the way, is a very long time.

### Summary:

To find out more about what's included in the Triple PA System, and how it can benefit your school productions and assemblies, click on the link to download the information brochure or contact us for a free site visit and assessment for your school hall or undercover area.
