CHOOSING THE RIGHT VIDEO CONFERENCING SOLUTION FOR YOUR BUSINESS!

Video conferencing has become a big part of the world we live in. Many businesses worldwide rely on this form of communication, whether it's to speak to prospects, clients or colleagues. It's important you have the video conferencing system you can trust.

Choosing the right video conferencing solution for your business is important, that is why we come to your office for a FREE site visit, to review you space and discuss your requirements prior to quoting, alternatively we can also offer a telephone or video chat consultation. We then get to work, designing you a solution best suited for your business.

There are 3 main considerations to keep in mind when deciding on your video conferencing solutions. They are: integration, room size/number of people using your room and what your video conferencing system/room is used for and who is using it.

1. Integration

What applications does your business use? Are you using Microsoft Teams? Zoom? Google Meet? Skype? Do you use multiple applications?

We offer solutions that can be locked to specific applications eg, where only Microsoft Teams can be used in certain rooms. However, sometimes this can cause future issues if you have someone that wants to have a Zoom meeting in your locked room and is unable to. We offer Hybrid room solutions that enable the use of all applications.

2. Size of your room & How many people sit in the meeting

Below is a guide to differentiate the types of meeting room sizes to determine your video conferencing requirements:

- Huddle Room/Huddle Space:
    - 3 to 5/6 people
    - Length: 2 to 5 meters
- Medium Meeting Room/Small Boardroom:
    - 6 to 10 people
    - Length: 5 to 7m
- Large Meeting Room/Boardroom:
    - 10 to 20 people
    - Length: 8+ meters (generally quite a wide room)
- Auditorium/Custom Video Conferencing/Presenting space:
    - 20+ People

CHOOSING THE RIGHT VIDEO CONFERENCING SOLUTION FOR YOUR BUSINESS!

3. What your video conferencing system/room is used for and who is using it.

Are you a large corporation? Do you provide a public meeting space? Is your boardroom only used by staff or a range of outside presenters?

Video conferencing solutions can be tailored for small scale usage, only by staff within your organisation, all operating with the same network and applications. However, if your meeting room is used by a range of people, including those from outside your organisation, issues can arise with people modifying the existing PC, altering settings and impacting on the functionality for subsequent users. In these circumstances we can offer a BYOD room solution which has the ability for anyone to bring their own device and connect to the system without the need to utilise and alter a dedicated PC.

The above is a brief guide to some considerations to take into account when choosing a video conferencing solution for your business. Bespoke solutions for video conferencing can take into account these three main factors, they can also incorporate a large number of other variables including:

Additional microphones, cameras, speakers or displays and their placement, touch control systems and interactive technology, mobile solutions, wireless connectivity and cabling requirements.

Addressing all these factors can create a trustworthy, easy to use video conferencing solution. Leave it to the experts to consider these factors and design a solution best suited to your business.

Call us on **(08) 9228 1681** to book in for a free AV site analysis so we can discuss all your requirements and provide a quote for a video conferencing solution you can trust.

Customised Solutions

Utilising the above high quality products, 3 Monkeys AV can design a video conferencing solution customised specifically for your Boardroom, Conference Room or Large presenting space.

Each client's specific requirements differ, including amounts or types of microphones, cameras, speakers or displays as well as many other variables including placement, cabling requirements, wireless connectivity and more.

To meet with one of our designers please contact us on **(08) 9228 1681** to schedule a FREE site visit.

MEDIUM INTEGRATED VIDEO CONFERENCING SOLUTIONS

Biamp Devio offers a range of video conferencing with a streamlined, automated and curated experience for huddle rooms through to large conferencing rooms.

Leveraging Biamp's unique technologies, Parlé Beamtracking®. Beamtracking is Biamp's patented technology that allows our intelligent microphones to point dynamic beams exactly where they are needed as talkers in a space speak and move around. This allows far-end participants to follow the discussion as it unfolds, creating a natural audio experience and breaking down barriers to truly collaborative meetings.

The Devio Microphones come bundled up with a conferencing hub amplifier. The Devio bundles are compatible with Biamps Tesira speakers as well as other alternative speakers, creating a complete audio system.

Condor Microphone and HuddleCam shown here mounted to your LED screen

Shure Array Microphones

Starting at $1,889ex

SHURE MXA910 Ceiling Array Microphone

With versatile mounting options, the MXA910 delivers speech that's naturally intelligible, giving you widespread coverage for AV needs of all sizes. Collaboration. Presentation. Training. With no mics or cables in the way, you're free speak, and clear to connect.

With Steerable Coverage™ and onboard IntelliMix digital signal processing, you can capture every voice. Patent-pending Autofocus™ technology fine-tunes the audio pickup in real time, for consistent sound even if participants lean back or stand up

SHURE MXA310 Table Array Microphone

The MXA310 integrates smartly into any space. Boardrooms. Huddle rooms. Multi-purpose areas. You can ensure speech is captured accurately and reproduced intelligibly. With Steerable Coverage™ and a low profile design, it removes unnecessary clutter, giving you even more clarity.

STEM CEILING Microphone Array

Stem Ceiling is an innovative microphone array that can be easily mounted on the ceiling of your conference room. With multiple beam settings to choose from, Ceiling enables you to create the perfect high quality coverage for every meeting room.

Hanging Microphone Array

Starting at $2,545ex

The ES954 Hanging Microphone Array, an ideal, cost-effective solution for huddle rooms, conference rooms and other meeting spaces. When controlled by the Audio-Technica ATDM-0604 Digital SMARTMIXER™, the four-capsule microphone array provides 360-degree coverage through virtual hyper-cardioid or cardioid outputs which can be steered horizontally and tilted vertically.

Intended primarily for video conferencing applications, the ES954 may be used singly or in multiples to capture every person speaking in a room, with the total number of channels restricted only by the capacity of the mixer or DSP device controlling the system.

THIS PACKAGE INCLUDES

1 x Digital Mixer

1 x Hanging Microphone array

1.2 Metre hanging cable

1 x Ceiling mount

AV CONTROL SYSTEMS

Starting at $359ex

AV Control System – (What is it? and why may I need it?)

An AV control system provides a simple way of controlling your AV system, it removes the necessity for confusing buttons, knobs or multiple remote controls that are often lost or broken, or found to have flat batteries.

AV control systems can come in many forms, this could be as simple as a small push button wall controller, through to a wall mounted or wireless control panel with a custom touch screen interface designed specifically for your facility.

AV control systems can often be programmed to control other devices within the room such as lighting and blinds, with a lot of the commonly required repetitive actions (dimming of lights, closing blinds etc) automated when using the AV system.

AV systems can also be programmed to ensure the AV system is turned off after a period of non-use or at a set time to reduce power costs and wear on the AV equipment.

Push Control Systems

Touch Control Systems

Digital Signage Solutions

Starting at $1,829ex

Digital signage displays are a great way to provide information about your business to potential or existing clients waiting in your reception area or looking through your front window, or alternatively providing internal data or content to your staff in your staff room.

There is a range of content management software available that makes creating and sharing daily updates and new content to your display quick and easy. You can show daily news and weather updates as well as have images and videos showing and much more.

Fusion Signage – Content Management

Starting at $99ex

Fusion Signage helps progressive businesses manage their digital signage content quicker and easier.

Fusion licences come in Basic, Advanced or Pro and have annual, 3 yearly and 5 yearly subscriptions available.

Quickly sign in via Windows Hello. Works exclusively with Windows 10 Pro and Enterprise on Surface Hub 2S 50''
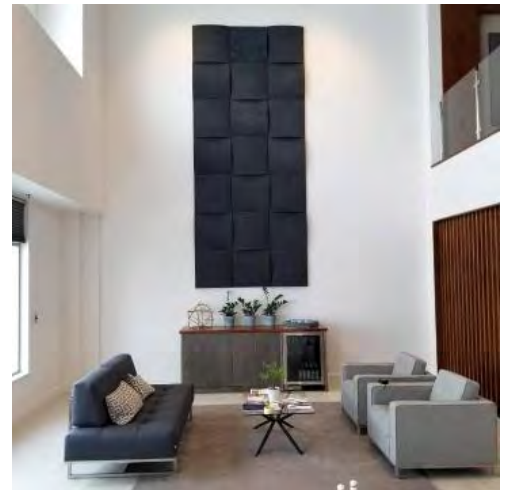

Cinema Round

Cinema Round panels are designed to maximise frequency absorption from 100 to 5000 Hz. They are perfect for correcting sound issues in a boardroom by lowering reflectivity issues and making your meetings much more convenial.

The finish is also high quality soft material interior design standard, so not only will they perform sonically, but also visually.

They can be placed on walls and ceiling for effect.

STANDARD COLOURS
(Other colour options available)

Vixagon Panels

Vixagon 40 FS Premium panels are designed to maximise frequency absorption from 100 to 000 Hz. Not as deep as Cinema Round, they still perform well over these frequencies to about 80% of the level of Cinema Round.

Being Hexagon design, it is possible to create some very unique looking designs. In some rooms it also may be more desirable to have "thinner" acoustic treatment.

The finish is also high quality soft material interior design standard, so not only will they perform sonically, but also visually. They can be placed on walls and ceiling for effect.

STANDARD COLOURS
*(Other colour options available)*

Starting at $1,799ex

ViCloud Ceiling Panels

ViCloud are designed for ceiling use only and focus on absorption of frequencies from 500 to 5000 Hz.

These can be used in conjunction with Cinema Round and Vixagon panels placed on the walls.

The advantage is their mounting mechanism enables a more flexible positioning proposition in a Boardroom, allowing for placement at differing heights if required as well as minimizing attachment points to the substrate surface.

In many cases, ViCloud could be sufficient enough in a Boardroom for the desired acoustic effect. These are especially effective for rooms that have only (or majority of) glass walls.

Made with environmentally friendly VicPET Wool (made from 85% recycled materials), they offer a very simple, effective and impactful solution.
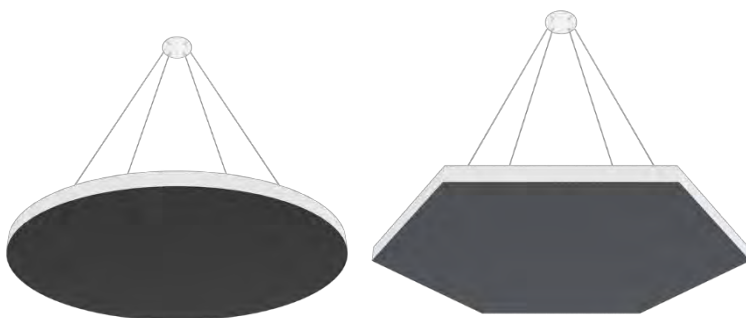

Standard shape is Round, however they can be ordered in:

- Square
- Hexagon
- Petal shapes

Optional Colours:

- Blue
- Light Grey
- Purple
- Pink, Red,
- Musk Green
- Celestial Blue
- Pumpkin Orange
- Bordeaux
- Brown
- Orange

STANDARD COLOURS ARE BLACK AND WHITE

Lectrum Classic/Aero

Starting at $1,405ex

The lectern of choice for leading hotels, conference centres and corporations.

There are a range of options to customize your lectern, with lots of colour choices for the metal frame and fabric panel as well as having your logo mounted onto the lectern.

Curved Truss Lectern

Starting at $1,285ex

Curved Style Lectern Truss with Clear Acrylic Top, Adjustable Base and Signage Frame, all Fixing Bolts & Feet.

FEATURES

- Clear Acrylic Top
- Cable Access Holes
- Hole for LED uplighter
- Adjustable Feet Under Base Plate
- Road Case Package available

Audio Pro Lectern

Starting at $1,135ex

The high quality Audiopro lectern, stylish designed and without the heavy barrier look of older style lecterns, will be a valuable asset to any special event venue or hire company.

With a fully welded steel frame with clip on extrusions the full width work area will easily accommodate a double width foolscap file together with a practical size lip at the bottom.

Projection Systems

Starting at $4,699ex

Complete Boardroom Projection System, Consisting of a *Data Projector*, *Projector Screen* and a *7 Input multi format switcher* making it nice and simple when switching between input sources.

Screen size and style is determined by available space, sizes ranging from 94" – 103" and styles can be a fixed screen, motorized or manual pull down.

We can mount the projector from your ceiling so it is out of the way leaving you with a neat and tidy boardroom table.

Audio System

To suit your projection system we install an audio system that is supplied with 2 x 20 watt Amplifiers and 2 x sleek white ceiling speakers (amount can vary depending on size of boardroom).

Control Panel

PUSH BUTTON OR TOUCH SCREEN

You can have the option of either a push button or touch screen controller that can be programmed to your requirements to turn on the projector, lower your screen, adjust the volume and switch to sources such as VGA/HDMI/PC/TV or Set top box inputs.

Control panel makes corporate presentations run nice and smoothly and is easy to switch between input sources.

3 Monkeys AV know exactly what they are talking about and recommending. They are a very professional company. The feedback from our staff is very impressive in regards to the performance and quality of the system. 3MAV have been very prompt to respond. The value of the products and services from 3 Monkeys AV is very reasonable. They would not be on the CUA if they were not value for money as government is very price conscious. The staff at 3 Monkeys Audiovisual are very professional and gave an extensive demonstration before making a decision on their purchase.

Kim Anastasio - Department of Training & Workforce Development

The presentation we received from 3 Monkeys AV was excellent. A Professional and detailed system plan with clear descriptions and illustrations made it easy to present and explain to executive. The system is brilliant, efficient and effective. The installation was neat and completed on time.
Everybody finds the system easy to use and we are so happy with its simple operation. At no time did we need to call 3 Monkeys AV as they clearly outlined the installation process and contacted us at the relevant times. 3 Monkeys AV customer service is excellent.

Narlin Dias - IT Coordinator, City of Nedlands

I have been impressed with 3 monkey's ability to design a complex system to meet our needs for simulation training. We had a tight budget and were offered a superior system that has allowed us to for fill our AV needs immediately as well as provided us the flexibility to increase the system functionality as we have updated our other equipment. The 3 Monkeys team has always been available and helpful during the development and after care stages. During the entire process I have always felt valued even though my project hasn't been the biggest or most expensive project. The service provided by 3 Monkeys has had a direct and positive impact on the way we have been able to deliver training to candidates within our Simulation training. Thanks again Francis.

Murray Giles - A/MET Educator, Fremantle Hospital and Health Service

The products were outstanding and we haven't had any issues. I couldn't be happier, the service was timely and we didn't require any follow up support. The value of the products and services was amazing. I didn't feel like I was spending my money, I was solving my problems. All the staff at 3 Monkeys AV were excellent, polite and on time. The range of products provided really suited our needs. 3 Monkeys Audiovisual is my first choice every time, I don't need to go anywhere else.

Michael Popkiss – SDA Fremantle

The quality of our Large Screen Projection and Audio System is top notch. We've never had any issues with the performance and we can't fault the system at all. The service and follow up support was fantastic. 3 Monkeys Audiovisual were easy to contact, consistently had quick responses and answered any questions or fixed any issues we had straight away.

Cameron Hunt – Swan care Group

WHY CHOOSE 3 MONKEYS AV

1.Reliable, quality audiovisual equipment that works

- We use top AV brands with proven performance and reliability.
- Every AV system is assembled and tested in our workshop by qualified technicians before installation in order to minimize any potential AV problems occurring later.
- As commercial/corporate AV specialists, all of our equipment has been thoroughly road tested and proven by our existing client base.
- 3 Monkeys AV is at the forefront of audiovisual technology, bringing you the latest time saving and breakthrough educational systems.

2. Expert advice on the right equipment and set up

- Our AV specialist team have over 80 years collective experience.
- With over 10,000 AV installations and hire jobs, our consultants and technicians know the best solutions for your company.
- To determine the best products and systems for your Installation, we conduct a unique 3 Stage **AV System Analysis and Plan**. This involves:

    1. Site meeting to identify your needs
    2. Preparation of a plan (proposal, budget, implementation timeline)
    3. Presentation to explain your various options.

3. Professional installation with a neat and tidy finish

- Our installation technicians are fully employed (not contractors), ensuring quality control on our workmanship and installation.
- Our project manager and technicians are conscious of minimizing disruptions during installation periods.
- We believe in leaving your environment as we found it, so our installers carry vacuums, drop sheets, dust pans and brushes.
- Your AV install will have a neat, tidy & clean finish, with all cables hidden or contained within conduits or ducts.

4. Thorough training, personalized service and timely support

- All our AV installs include comprehensive training to ensure your staff get the full benefit of the equipment and system.
- As specialists in commercial/corporate AV, we have both AV trainers and ex teachers to educate your staff in using the audiovisual equipment effectively.
- We are committed to providing regular ongoing phone and face to face support.
- Whilst many others sell AV product and move on, 3 Monkeys AV will provide timely support, customer service and troubleshooting for the life of your AV equipment & systems.

5. Reputable, professional AV Specialists

- 3 Monkeys AV is a team of specialists who have worked in all areas of audiovisual in Perth over the last 30 years.
- Our company is fully insured and professionally run. We carry licenses with APRA and ACMA.
- Our specialist staff are all police cleared, hold Working With Children Checks and have completed all relevant safety training.
- You will be looked after by a WA owned and operated team that cares about our customers.
